Google Scholar Profile

Summary

My research explores systems and networks, focusing on the adaptation of applications to wireless networks. I work on improving network performance and leveraging machine learning to address real-time optimization of communication, resource allocation, and data offloading to cloud/edge devices.

Education

- **Indraprastha Institute of Information Technology Delhi** — Delhi, India
  Ph.D. Computer Science — *Since Dec 2022*
  - Thesis Title: Cloud-Assisted Autonomous Driving over Wireless Network
  - Advisor: Arani Bhattacharya
  - CGPA: 8.55 / 10
- **Goa College of Engineering** — Goa, India
  M. Tech Information Technology — *2019 - 2021*
  - Thesis Title: An IoT based Real-Time Monitoring of Water Quality System
  - Advisor: Amogh Sanzgi
  - Score: 85.31 / 100
- **Vishwavidyalaya Engineering College, Ambikapur** — Chattishgarh, India
  B. Tech Computer Science — *2014 - 2018*
  - Graduated with First Class with Distinction
  - Score: 83.71 / 100

Professional Experience

- **Teaching Assistant** — New Delhi, India
  Indraprastha Institute of Information Technology Delhi — *2023 - 2024*
  - Conducted tutorials, assignment demos, quiz preparation, paper checking, and grading:
    * Object-Oriented Programming and Design (Monsoon 2024)
    * Mobile Computing (Winter 2024)
    * Advanced Programming (Monsoon 2023)
    * Fundamentals of Database Systems (Winter 2023)
- **Assistant Professor** — Punjab, India
  Chandigarh University — *2021 - 2022*
  - Taught undergraduate course, quiz preparation, and grading:
    * Object-Oriented Programming using C++ (Monsoon 2022)
    * Fundamentals of Computer Programming (Winter 2022)

Selected Publications

Skills

- **Programming Languages:** C, C++, Java/Android, Python, Bash shell
- **Libraries/Software Packages**: numpy, pandas, sklearn, matplotlib, PyTorch, OpenCV, ffmpeg, scrcpy
- **Software Tools**: Android Studio, Git, Docker, Visual Studio Code, Eclipse
- **Miscellaneous**: Algorithms, Data Structures, Problem Solving

Current Projects

- **Cloud-Assisted Autonomous Driving Over Wireless Network:** Autonomous driving relies on large machine learning models for safety-critical decisions, but these models require significant computational resources. This work focuses on a scalable, scene-aware AV perception system that offloads data to the cloud or edge over dynamic networks to reduce the computation on local system. Using CARLA and Pylot for autonomous driving simulation, our approach improves object detection while maintaining low latency.
- **Remote Operation of Vehicle: Do Satellite Networks Outperform Cellular Networks?** The project deals with the remote control of self-driving cars. It focuses on the tradeoff between video quality and latency while prioritizing the video feed based on the teleoperation's head movements and identifying the most important video parts (by detecting the obstacle in the frame) for decision-making. We tested remote driving using real-world traces of cellular and satellite networks.
- **Web Measurement for Transfer Size and Page Load Time Analysis:** The project focuses on improving mobile web browsing performance by analyzing factors that impact web page performance, such as transfer size and page load time. The goal is to propose solutions that enable mobile devices to perform better without relying on external dependencies. By addressing these performance factors, the project aims to optimise mobile browsing, ensuring a smoother and more efficient user experience.

Awards

- **PhD Fellowship**, Received the All India Council of Technical Education Doctoral Fellowship (ADF) for a 4-year PhD program, receiving a total fellowship of USD 21,450 (2022-2026).
- **Master of Engineering Fellowship**, Received All India Council of Technical Education postgraduate scholarship for a 2-year master program, total fellowship of USD 3,345 (2019-2021).
- **GATE**, Qualified Graduate Aptitude Test in Engineering (2019)

Academic Service

- Member of Shadow Technical Program Committee, ACM Internet Measurement Conference (IMC) 2025.
- Subreviewer, IEEE Vehicular Technology Conference (VTC) 2025.
- Subreviewer, IEEE International Conference on Distributed Computing Systems (ICDCS) 2025.
- Presented my work at the India Mobile Congress (IMC) 2024.
- Presented a poster at the Doctoral Consortium, ACM Compass 2024.
- Participated in Research Innovation and Incubation Showcase Events (RIISE) 2024, IIIT-Delhi.
- Volunteered and conducted a hands-on session on Linux networking at the ACM Winter School 2023.
